

WANTED

All the wild species you can see
in your everyday life.

Join Rutgers' 8th
PERSONAL BIOBLITZ 2021

When? 76 days, 1 March to 15 May 2021, 24/7, anywhere on Earth.

How? Discover, see, listen, photograph, learn, identify (and get help to identify, beginners welcome!), upload to iNaturalist and our project.

Why? Learn more about what lives right around you - birds, plants, microbes, algae, fungi, insects, mollusks, mammals...

Who? Anybody associated with Rutgers University in any way (incl. friends and family of Rutgers' people and all bioblitzers).

What? Any wild species anywhere in the world that you personally experience (special rules apply, see website).

All species observed as part of this project on iNaturalist will be added to the growing amount of community science observations that are being used for global biodiversity science.
